Assignment 3: Part 3 Winged Dragon

Ali Alnazeir Ahmed --> 20230824

Ahmed Mohamed Ahmed --> 20231013

Abdullah Alaa --> 20231103

explaining the 2 new filters:

Filter 1: Color Grading

the Color Grading filter is It allows users to darken or lighten the image by a certain percentage. For instance, it might offer the option to darken or lighten the image by 50% from the original. For a major competition, it might enable users to choose the level of darkening or lighting from 0 to 100%

Filter 2: Saturation

The Saturation filter is a tool used in photo and video editing to adjust the colors and visual appearance. It allows users to change the saturation level of colors in the image, enhancing brightness and clarity or making colors more vibrant and lively
